

Endnotes

Introduction

P. 10

Helicopters searched the ground: Douglas Martin, “Wild (and Unleashed) Coyote Is Captured in Central Park,” *The New York Times*, April 2, 1999.

captured in various places unsanctioned by humans: Corey Kilgannon, “Coyote, a Wily Survivor, Is Alpha at His Zoo Home,” *The New York Times*, March 19, 2000.

P. 13

ten percent of the globe’s largest remaining swaths of forest: John W. Reid and Thomas E. Lovejoy, *Ever Green: Saving Big Forests to Save the Planet* (New York: W.W. Norton, 2022), 8.

P. 14

Academics call it the Great Acceleration: Will Steffen et al., “The Trajectory of the Anthropocene: The Great Acceleration,” *The Anthropocene Review*, January 16, 2015.

Pp. 16-17

About 40% of the planet’s land: UNEP (2019), *Frontiers 2018/19 Emerging Issues of Environmental Concern*, United Nations Environment Programme, Nairobi. (See chapter 2: Ecological Connectivity.)

Cities...are expanding: This and subsequent facts about cities from R. A. McManamay, C. R. Vernon, M. Chen, et al., Dynamic urban land extensification is projected to lead to imbalances in the global land-carbon equilibrium, *Communications Earth & Environment* 5, 70 (2024); and R. I. McDonald, A. V. Mansur, F. Ascensão, et al., “Research gaps in knowledge of the impact of urban growth on biodiversity,” *Nature Sustainability* 3 (2020): 16-24.

Less than 15 percent: See UNEP report above.

In the U.S., only 41 percent: J. L. McGuire, J. J. Lawler, B. H. McRae, T. A. Nuñez, and D. M. Theobald, “Achieving climate connectivity in a fragmented landscape,” *Proceedings of National Academy of Sciences of the U.S.A.* 113 (26): 7195-7200.

And that’s just the longest rivers: G. Grill, B. Lehner, M. Thieme, et al., “Mapping the world’s free-flowing rivers,” *Nature* 569 (2019): 215-221.

animals of all kinds are roaming less: Marlee A. Tucker et al., “Moving in the Anthropocene: Global reductions in terrestrial mammalian movements,” *Science* 359 (2018): 466-469.

P. 21

I’m reminded of a picture book starring Curious George: Margret Rey and H. A. Rey, *Curious George’s Dinosaur Discovery* (Boston: Houghton Mifflin Harcourt, 2006).

Chapter 1

P. 27

Information on Fort Collins and other Front Range cities from Fort Collins History Connection and Zillow, as well as Wikipedia entries for Frederick and Dacono.

P. 38

A story about Lovejoy's Amazon Biodiversity Center: Amanda Paulson, "Camp Amazon: Inside the Lungs of the Earth," *Christian Science Monitor*, January 2, 2019, <https://www.csmonitor.com/Environment/2018/0924/Camp-Amazon-Inside-the-lungs-of-the-Earth>.

As Lovejoy himself summed it up: Reid and Lovejoy, *Ever Green*, p. 22.

P. 39

One group of scientists put it best: Adina Merenlender, Jodi A. Hilty, and William Zander Lidicker, *Corridor Ecology: The Science and Practice of Linking Landscapes for Conservation*, 2nd edition (Washington, DC: Island Press, 2019), 60.

In a paper published in 2015: Nick M. Haddad et al., "Habitat fragmentation and its lasting impact on Earth's ecosystems," *Science Advances* 1, e1500052 (2015).

P. 42

and those impacts only get worse over time: *Ibid.*

P. 44

In Y2Y's first twenty-five years: Mark Hebblewhite et al., "Can a large-landscape conservation vision contribute to achieving biodiversity targets?," *Conservation Science and Practice*, January 2022.

P. 45

Albrecht described solastalgia: G. Albrecht, G. M. Sartore, L. Connor, N. Higginbotham, S. Freeman, B. Kelly, H. Stain, A. Tonna, and G. Pollard, "Solastalgia: the distress caused by environmental change," *Australasian Psychiatry*, 2007; 15 Suppl 1:S95-8.

Chapter 2

P. 50

In a later experiment, published in 2011: Graham Bell and Andrew Gonzalez, "Adaptation and Evolutionary Rescue in Metapopulations Experiencing Environmental Deterioration," *Science* 332 (2011): 1327-1330.

P. 51

according to environmental historian Peter Alagona: Peter Alagona, *The Accidental Ecosystem: People and Wildlife in American Cities* (Oakland: University of California Press, 2022).

P. 52

When the English sea captain Henry Hudson: Eric W. Sanderson, *Mannahatta: A Natural History of New York City* (New York: Harry N. Abrams, 2009).

Urbanization is one of the most powerful forces: Nature in the Urban Century, <https://www.nature.org/en-us/what-we-do/our-insights/perspectives/nature-in-the-urban-century/>.

P. 54

In the contiguous U.S., according to research: Susannah B. Lerman, Kelli L. Larson, Desirée L. Narango, Mark A. Goddard, and Peter P. Marra, “Humanity for Habitat: Residential Yards as an Opportunity for Biodiversity Conservation,” *BioScience* 73, no. 9 (September 2023): 671–689.

P. 56

So, it relocated an entire town: <http://www.ellentonsc.com/reunion.html>.

Before Europeans settled the area: Savannah River Site Environmental Report, 2021, [https://www.srs.gov/general/pubs/ERsum/er21/docs/2021 annual report summary final.pdf](https://www.srs.gov/general/pubs/ERsum/er21/docs/2021%20annual%20report%20summary%20final.pdf).

P. 61

A decade ago, Damschen designed an experiment: E. I. Damschen et al., “How fragmentation and corridors affect wind dynamics and seed dispersal in open habitats,” *Proceedings of the National Academy of Sciences of the U.S.A.* 111, no. 9 3484–3489 (2014).

More recently, Damschen led a team: Ellen I. Damschen et al., “Ongoing accumulation of plant diversity through habitat connectivity in an 18-year experiment,” *Science* 365 (2019):1478–1480.

In research published in 2009: L. A. Brudvig, E. I. Damschen, J. J. Tewksbury, N. M. Haddad, and D. J. Levey, “Landscape connectivity promotes plant biodiversity spillover into non-target habitats,” *Proceedings of the National Academy of Sciences of the U.S.A.* 106(23) (June 9, 2009): 9328–9332.

A study published in 2022 set out to map connectivity: A. Brennan et al., “Functional connectivity of the world’s protected areas,” *Science* 376 (2022):1101–1104.

P. 64

Led by the Australian ecologist William F. Laurance: W. Laurance, G. Clements, S. Sloan, et al., “A global strategy for road building,” *Nature* 513 (2014): 229–232.

At the time, the International Energy Agency estimated: IEA “Global Land Transport Infrastructure Requirements,” 2013, https://www.ctc-n.org/sites/www.ctc-n.org/files/resources/transportinfrastructureinsights_final_web.pdf.

P. 65

another op-ed Laurance published in the journal Nature: W. F. Laurance and I. B. Arrea, “Roads to riches or ruin?,” *Science* 358 (6362) (October 27, 2017): 442–444.

A decade later, the website Energy Monitor reported: “Exclusive: how \$4trn of global road projects threaten net-zero pledges,” June 8, 2023, <https://www.energymonitor.ai/sectors/transport/exclusive-how-4trn-of-global-road-projects-threaten-net-zero-pledges/>.

P. 66

A 2017 report by the conservation group WWF: “The Belt and Road Initiative: WWF Recommendations and Spatial Analysis,”

https://awassets.panda.org/downloads/the_belt_and_road_initiative_wwf_recommendations_and_spatial_analysis_may_2017.pdf.

P. 67

And they’re not just good for animals: R. Ament, S. Jacobson, R. Callahan, and M. Brocki, eds., “Highway crossing structures for wildlife: Opportunities for improving driver and animal safety,” Gen. Tech. Rep. PSW-GTR-271 (Albany, CA: U.S. Department of Agriculture, Forest Service, Pacific Southwest Research Station, 2021).

“Unlike many large-scale problems facing society”: “New Thinking: Why are animals dying on our roads?”, Animal Road Crossing, <https://arc-solutions.org/new-thinking/>.

eighteen wildlife corridor and crossing laws were passed: Matt Scroch, “Wildlife and People Benefit from New Habitat Connectivity Laws,” Pew Trust, July 19, 2023, <https://www.pew.org/en/research-and-analysis/articles/2023/07/20/wildlife-and-people-benefit-from-new-habitat-connectivity-laws>.

Pp. 67-70

60 percent of the funding intended for rural areas: <https://highways.dot.gov/federal-lands/wildlife-crossings> and <https://www.transportation.gov/rural/grant-toolkit/wildlife-crossings-pilot-program>.

P. 70

The Federal Highway Administration received sixty-seven applications: Wildlife Crossings Program, U.S. Department of Transportation Federal Highway Administration, <https://highways.dot.gov/federal-lands/programs/wildlife-crossings-pilot-program>.

an overpass can run more than \$6 million: Tom Banse, “Animal crossings over and under highways can save big dollars—not just lives—says new study,” Oregon Public Broadcasting, August 31, 2022.

collisions with large mammals cost: “New Study Identifies Important Highway Locations for Wildlife Crossings in Western States,” Center for Large Landscape Conservations, September 13, 2023, <https://largelandscapes.org/news/west-wide-study/>.

P. 71

Research published in 2017 found distinct genetic differences: Claire Wacziarg, “Genetic research reveals impact of the 101 Freeway on Los Angeles Wildlife,” UCLA Newsroom, October 30, 2017, <https://newsroom.ucla.edu/releases/genetic-research-reveals-impact-of-freeway-on-los-angeles-wildlife>.

The Wallis Annenberg crossing will also help the wrentits: Hallie Golden, “How the World’s Largest Wildlife Overpass Could Brighten a Low-Flying Bird’s Future,” *Audubon*, May 19, 2022.

P. 73

according to a 1996 story in *The New York Times*: Les Line, “Accord Is Reached to Recall Pesticide Devastating Hawk,” October 15, 1996.

P. 74

less than 1 in 10,000: Kristen C. Ruegg et al., “Mapping migration in a songbird using high-resolution genetic markers,” *Molecular Ecology*, December 2014.

P. 78

What barriers does it contain: Mark Anderson and Melissa Clark, “Modeling Landscape Permeability,” The Nature Conservancy, 2024,
<https://www.conservationgateway.org/ConservationByGeography/NorthAmerica/UnitedStates/edc/Documents/ModelingLandscapePermeability.pdf>.

Chapter 3

P. 87

A study published in the journal *Science*: Evan C. Fricke et al., “Collapse of terrestrial mammal food webs since the Late Pleistocene,” *Science* 377 (2022): 1008-1011.

P. 90

A report published in 2020: Daniel Thornton et al., “Precipitous decline of white-lipped peccary populations in Mesoamerica, *Biological Conservation* 242 (February 2020), 108410.

P. 91

during extreme drought in 2015 in Papua New Guinea: K. Sam, L. R. Jorge, B. Koane, R. J. Hazell, P. L. Shearman, and V. Novotny, “Reorganization of bird communities along a rainforest elevation gradient during a strong El Niño event in Papua New Guinea,” *Ecology and Evolution*, 14, no. 5 (May 15, 2024), e10955.

one of the largest remaining forested areas in Central America: Talamanca Range-La Amistad Reserves / UNESCO World Heritage Convention, <https://whc.unesco.org/en/list/205/>.

P. 92

“rampant deforestation associated with bananas, cows, and gold”: Andrew Whitworth, “Harpy eagle’s return to Costa Rica means rewilding’s time has come (commentary),” *Mongabay*, September 27, 2022.

forest cover has increased 150 percent: Ibid.

P. 94

More than 28 percent of the country’s land: United Nations Convention on Biological Diversity, Aichi Biodiversity Target 11 Country Dossier: Costa Rica, <https://www.cbd.int/pa/doc/dossiers/costa-rica-abt11-country-dossier2021.pdf>.

Nearly half of the total global pineapple trade: Daniel Workman, “Pineapples Exports by Country,” Word’s Top Exports, <https://www.worldstopexports.com/pineapples-exports-by-country/>.

P. 95

“the second most important conservation strategy”: <https://www.sinac.go.cr/EN-US/correbiolo/Pages/default.aspx>.

P. 97

All the way back in 2003: C. Parmesan and G. A. Yohe, “A globally coherent fingerprint of climate change impacts across natural systems,” *Nature* 421 (2003), 37–42.

A 2011 study found: Sarah Hubbart, “How Climate Change Is Changing Animal Habits,” NEEF, October 4, 2023, <https://www.neefusa.org/story/climate-change/how-climate-change-changing-animal-habits>.

between two and ten times more quickly: Benjamin G. Freeman et al., “Montane species track rising temperatures better in the tropics than in the temperate zone,” *Ecology Letters* 24, no. 8 (August 2021), 1697–1708.

on one Peruvian mountain: B. G. Freeman et al., “Climate change causes upslope shifts and mountaintop extirpations in a tropical bird community,” *Proceedings of the National Academy of Sciences of the U.S.A.* 115 (47), 11982–11987 (2018).

P. 98

“landscapes supporting herds of megafauna”: C. H. Trisos, J. Auerbach, and M. Katti, “Decoloniality and anti-oppressive practices for a more ethical ecology,” *Nature Ecology & Evolution* 5, 1205–1212 (2021).

85 percent within half a century: J. Leighton Reid et al., “The ephemerality of secondary forests in southern Costa Rica,” *Conservation Letters*, September 26, 2018.

P. 110

Around 322 vertebrate species: Rodolfo Dirzo et al., “Defaunation in the Anthropocene,” *Science* 345 (2014), 401–406.

Chapter 4

P. 119

725 gallons of water to manufacture one Tesla: <https://www.tesla-mag.com/en/tesla-uses-less-water-per-vehicle-than-industry-average/#:~:text=On%20average%2C%20Tesla%20factories%20use,process%20of%20ramping%20up%20production>.

P. 128

“at risk of severe population decline in the next 15 years”: “2023 North American State of the Bats Report Indicates that 52% of Bat Species Across the State Are at Risk of Severe Population Decline,” 2023 North American State of the Bats Report, April 17, 2023, <https://www.batcon.org/press/2023-north-american-state-of-the-bats-report/>.

Chapter 5

P. 144

“the reassembly of a guild of large herbivores”: Paul Jepson and Cain Blythe, *Rewilding: The Radical New Science of Ecological Recovery* (Cambridge, MA: MIT Press, 2020), 6.

P. 146

until they became isolated in Parco Nazionale D’Abruzzo Lazio e Molise: From Salviamo L’Orso: <https://www.salviamolorso.it/en/bear-facts/history/>.

P. 148

As one recent Italian research paper put it: Riccardo Lucchetti and Gabriele Morettini, “Depopulation in the Apennines in the 20th century: an empirical investigation,” Working Papers 463, Università Politecnica delle Marche (I), Dipartimento di Scienze Economiche e Sociali, 2022.

coined the term “anthropogenic resistance”: Arash Ghoddousi et al., “Anthropogenic resistance: Accounting for human behavior in wildlife connectivity planning,” *One Earth* 4, no. 1, (January 22, 2021): 39–48.

P. 149

Another seven were hit by trains: Naturaprotetta no. 26 (2023), <https://www.parcoabruzzo.it/pdf/NatProtetta26.pdf>.
